Experience

Freelance Software Developer

September 2019 - Present

I developed frontend and backend solutions as an independent freelancer.

"His technical abilities are very impressive. And he completed all of my requests in a very reasonable timeframe. I certainly plan on working with him again in the future."
- Private client

"Brett saw different and more efficient ways to make the project better. Left suggestions for improvements. Was friendly and very professional. Left some creativity in his hands and he excelled more than I imagined. Would highly recommend him."
- Barry Thompson

WhenPeoplePlay.com

May 2020 - June 2020

WhenPeoplePlay.com wanted to prototype online team-building exercises.

- The client presented the prototype to the company successfully.

- I learned ReactJS while working on this project.

Arcade Game Developer

September 2019 - April 2020

- I built several games for the client's upcoming arcade and bar.

Software Engineer Internship — Seattle, Wa

http://sarah-smith-website-resume-brett-yeager.s3-website-us-west-2.amazonaws.com
May 2018 - September 2018

The project was a new website that would better communicate the campaign's message and give information about upcoming events. It would replace the existing Wix website.

- Responsible for
  - CI/CD
  - Backend Node.js functionality
  - Web Analytics
- Achieved
  - Significantly faster load time (8 seconds faster)

Monodot — *Android Puzzle Game*

https://play.google.com/store/apps/details?id=hi.brett.monodot

- Impact: 80,000 people have enjoyed solving puzzles in Monodot.

About Me

I put effort into being the best me I can be. What does that look like?

- **Critical thinking:** I enjoy practicing and improving my critical thinking and skepticism skills.

- **Impact motivated:** Even small projects can help millions of people. That's my favorite thing about software development.

- **Fitness (and healthy eating!)** The way I see it, it's like turning my mind and body from a core i3 into an i7. 😊

SKILLS

C#, Javascript, Java

ReactJS, NoSQL, HTML5, CSS3, AJAX, JSON

Node.js, AWS, Google Cloud, Git, Express, Continuous Deployment, Some experience with Machine Learning
